

## “The CHARME of standardisation in life sciences”

Standardisation issues are addressed in many research fields, e.g. R&D, education, technology transfer and application but these research areas are often poorly connected. The aim of this conference is to build a platform for stakeholders that could transform a fragmented debate into an organized and fruitful diversity

The conference intends to explore the needs and the dimension of the relation between standardization and innovation. Representatives from academia, industry and standardisation bodies who have been making exceptional contributions to develop and disseminate standards will inform and discuss with the participants the pros and cons of the use and implementation of standards in the daily work flow.

### Additional contents

Existing platforms and tools will be presented to inform and share them within the scientific community from the fields of:

- agriculture, food security & nutrition
- human and animal health care
- biotechnology
- computational biology
- systems biology, systems medicine & synthetic biology

### Submission

If you would like to present at the conference, you are invited to submit an abstract directly relevant to the thematic areas and topics:

- Innovation in Technology
- Data (data systems, gaps, how to collect, etc.)
- Science-Policy-Implementation Interface
- Education and Training
- Standardisation tools, platforms & repositories
- Publications

We address the following lines of research: fundamental and applied research in life sciences including industrial needs.

### The Submission deadline is June, 10th

**Invited speakers** *Alvis Brazma (UK), Ricardo Gent (DE), Peter McQuilton (UK), Andreas Kremer (LUX), Florence Botteri (Novartis), Christof Gaenzler (PE), Ray Walshe (IR), Ugur Sezermann (TU), Domenica D'Elia (IT), Chris Evelo (NL), Pierre-Alain Binz (CH), Christoph Endrullat (DE) Barend Mons (NL) Klemen Zupančič (SL), Kristina Gruden (SL) Markus Frohme (DE) Susanne Hollmann (DE) Babette Regierer (DE), Witold Rudnicki (PL), Martin Golebiewski (DE), Natalie Stanford (UK), Terri Attwood (UK), Nick Juty (UK), Reza Salek (UK) and others*

Registration and abstract submission at: <http://www.cost-charme.eu/events>

The conference is open to observers (i.e. non-presenters).
