WHO IS THIS SERVICE FOR?

IT services are intended for researchers searching

- for samples and data
- for biobankers promoting their biobanks and looking for fellow biobanks
- for funding organisations to provide overview of infrastructure, as well as other users. It is primarily intended for users located in Member Countries of BBMRI-ERIC.

WHO TO CONTACT?

Petr Holub, Ph.D.
BBMRI-ERIC Senior IT and Data Protection Manager and CIO of CS IT

KEY IT SERVICES

✔ **Directory** - intended for all different types of users, providing aggregate information about biobanks and their sample/data collections.
https://directory.bbmri-eric.eu

✔ **Negotiator** - facilitating communication between researchers requesting samples/data from biobanks, allowing refinement of their queries.
https://negotiator.bbmri-eric.eu
(also reachable via Directory)

✔ **BIBBOX** - integrated toolbox for biobanks based on open-source software
http://bibbox.org

✔ **MIABIS 2.0** – community standard for sharing information about biobanks, their collections of biological material and data, *https://github.com/MIABIS/miabis/wiki*

In order to provide these main services, a number of other components are under development, ranging from advanced search tools to data harmonization services and extraction of structured data from unstructured clinical records.
