BBMRI.QM Academy - Live Educational Webinar

Pre-analytical phases of biobanking
Part 2: Lab - Sample Fractionation
Scientific & Organising Committee: Priv.-Doz. Dr. Dr. Michael Kiehntopf
Priv.-Doz. Mag. Dr.med.univ. Dr.scient.med. Helmuth Haslacher, BSc, BA
Peter Riegman, Ph.D.

Wednesday, October 20, 2021
Host: Prof. Jens K. Habermann, M.D., Ph.D.
Moderator: Andrea Wutte, MSc and Ulrike Rohrer, DI (FH), MBA

General description, scope and objectives:
Key expert Dr. Łukasz Kozera will present in this webinar the most novel key elements of laboratory and biobanking activities, from sample transportation to fractionation including centrifugation and time limits; these are currently important and will play an even more important role in the future of biomedical research. Dr. Kozera will provide balanced content between the latest science and good everyday practice.

This webinar is designed for managers and associates of biobanks, laboratories and quality departments, as well as researchers and pathologists, but also for anyone wishing to update their scientific knowledge on the topic.

After watching the webinar, participants will be able to:
- recognise the causes of pre-analytical errors;
- understand the issues related to sample, transportation and fractionation and
- comprehend the time limits of sample fractionation.

During the webinar, participants will be encouraged to send questions via chat and to interact with the key speaker who will provide live feedback.
